Eclettico e senza confini, uno stile modulare che valorizza anche i piccoli ambienti con le sfumature del materiale di ispirazione. La pietra classica reinterpretata ridefinisce lo spazio moderno.

An eclectic modular style without borders that underlines even the smallest spaces with the hues of the material inspiring it. Classic stone is reinterpreted to define modern spaces.

Eclectique et sans frontières, un style modulaire qui valorise également les petits espaces grâce aux nuances du matériau d'inspiration. La pierre classique réinterprétée redéfinit l'espace moderne.

Eklektisch und grenzenlos – ein modularer Stil, der auch kleine Räume mit den Abstufungen des Ausgangsmaterials adelt. Der klassische Stein wird hier neu interpretiert um den modernen Raum zu definieren.

PULIZIA DEL MATERIALE CERAMICO
CLEANING OF CERAMIC MATHERIAL . NETTOYAGE DU CARRELAGE CÉRAMIQUE
REINIGUNG DES KERAMIKMATERIALS . LIMPIEZA DEL MATERIAL CERÁMICO

In caso di macchie particolari e/o particolarmente tenaci, è consigliabile l'uso di detergenti specifici: è importante fare sempre un test preventivo su una piastrella prima dell'utilizzo del prodotto selezionato, in particolare su gres porcellanato Lappato o Levigato, e leggere le istruzioni d'uso. Per quanto riguarda la pulizia ordinaria Elios Ceramica sconsiglia l'uso di cere, saponi oleosi e prodotti impregnanti. È invece consigliato l'utilizzo di varechina ed ammoniaca, opportunamente diluite in acqua, con successiva asciugatura del pavimento solo su grès porcellanato Levigato, onde evitare la visibilità di aloni. Si fa presente che, le norme sopracitate non prevedono la pulibilità da tracce di gomma (scarpe, tacchi,tappi di sedie, etc...) in particolare negli ambienti dove tali fenomeni sono maggiormente possibili e ripetitivi. In generale comunque la specifica lavorazione di Levigatura o Lappatura rende la superficie più lucida asportando una parte di materiale e quindi aprendo alcuni micro-pori in superficie, rendendo il prodotto più attaccabile alle macchie. Pertanto, su tali prodotti Elios Ceramica declina ogni responsabilità. Ci teniamo a sottolineare che, prodotti in tinta unita di coloremolto chiaro e ancor più se bianco o extrabianco sono relativamente delicati in qualsiasi superficie, rispetto taluni tipi di macchie, in quanto le stesse possono lasciare tracce o aloni più visibili che su prodotti meno chiari. Occorre pertanto tenere presente che tali macchie comportano una manutenzione più accurata e tempestiva per la pulizia. La manutenzione ordinaria deve necessariamente essere effettuata con prodotti specifici, atti all'eliminazione di segni o macchie (si veda tabella "prodotti per la pulizia"). Per tutti i colori ed in particolare per i colori bianchi, diventa estremamente importante la prima pulizia post posa in opera al fine di rimuovere del tutto i residui di stucco, che possono creare un film cementizio capace di assorbire ogni forma di sporco e che facilita la sporcabilità del prodotto. In generale su tali prodotti una pulizia non adeguata o tardiva del materiale ceramico può causare seri problemi di sporco poi difficile da rimuovere completamente in fase di successiva pulizia. In questi casi Elios Ceramica declina ogni responsabilità. Vi invitiamo a consultare la nostra scheda “prodotti per la pulizia”.

Use specific detergents for stubborn stains: always test the product on a tile prior to use, particularly when treating lapped or polished porcelain stoneware; read the instructions carefully. For routine cleaning Elios Ceramica advises against the use of wax, oil soap or impregnating products. It recommends the use of bleach and ammonia, suitably diluted in water, drying the floor afterwards only for Polished porcelain stoneware, in order to prevent smudges. The above standards do not include the possibility to clean traces of rubber (from shoes, heels, chair caps, etc...) particularly in areas where this is possible or repetitive. Generally, the specific Polishing or Lapping process makes the surface shinier and removes a part of the material, opening micro-pores in the surface and making the product more at risk of staining. Therefore Elios Ceramica declines all liability for these products. It should be underlined that plain very pale colours and even more so white and extrawhite are relatively delicate for any surface, in terms of staining, as traces and smudges are more visible than on darker products. For all colours, particularly white, it is extremely important to carry out deep-down cleaning after laying in order to remove all grout residues, which could leave a cement film which absorbs dirt and leaves the product open to the risk of getting dirty. Generally, unsuitable or late cleaning of ceramics can cause serious problems in terms of dirt which is difficult to remove completely at a later stage. In these cases, Elios Ceramica declines all liability. Consult the "cleaning products"sheet.

En présence de taches particulières et/ou très tenaces, il est conseillé d'utiliser des détergents spécifiques: il est important de toujours faire un test sur un carreau avant d'utiliser le produit sélectionné, en particulier sur du grès cérame Rodé ou Poli, et de lire le mode d'emploi. En ce qui concerne le nettoyage ordinaire, Elios Ceramica déconseille l'utilisation de cires, de savons huileux et de produits imprégnants, et conseille en revanche l'utilisation d'eau de javel et d'ammoniac, correctement dilués dans de l'eau, puis de sécher le sol, uniquement sur du grès cérame Poli, afin d'éviter l'apparition de halos.

Nous signalons que les normes indiquées ci-dessus ne prévoient pas la possibilité de nettoyage de traces de caoutchouc (chaussures, talons, embouts de pieds de chaises, etc.) en particulier dans les locaux dans lesquels ces phénomènes sont le plus fortement possibles et répétitifs. En général en tout cas, les opérations spécifiques de Polissage ou de Rodage du carrelage rendent la surface plus brillante en éliminant une partie de matériau et par conséquent en ouvrant des micropores sur la surface, ce qui rend le carrelage plus vulnérable aux taches. Par conséquent, Elios Ceramica décline toute responsabilité sur ces produits. Nous tenons à souligner que des carrelages de teinte unie de couleur très claire, et plus encore s'il s'agit de blanc ou d'extra-blanc, sont relativement délicats sur n'importe quelle surface, par rapport à certains types de taches, car celles-ci peuvent laisser des traces ou des halos plus visibles que sur des carrelages moins clairs. En ce qui concerne le nettoyage, il faut par conséquent garder présent à l'esprit que pour lutter contre ces taches, un entretien plus soigné et plus rapide est nécessaire. L'entretien ordinaire doit impérativement être réalisé avec des produits spécifiques, aptes à l'élimination de marques ou de taches (voir tableau "produits pour le nettoyage"). Pour toutes les couleurs et en particulier pour les couleurs blanches, le premier nettoyage après-pose devient extrêmement important afin d'éliminer totalement les résidus de mastic qui peuvent créer une pellicule de ciment capable d'absorber toute forme de saleté et qui facilite la salissabilité du carrelage. En général sur ces carrelages, un nettoyage non adéquat ou tardif du matériau céramique peut provoquer de sérieux problèmes de saleté qu'il est ensuite difficile d'éliminer complètement lors de la phase de nettoyage successif. Dans ces cas, Elios Ceramica décline toute responsabilité. Nous vous invitons à consulter notre fiche "produits pour le nettoyage".

Bei besonderen bzw. hartnäckigen Flecken wird die Verwendung spezifischer Reinigungsmittel empfohlen: es ist wichtig, dass ein vorbereitender Test auf einer Fliese vorgenommen wird, bevor das gewählte Produkt benutzt wird, insbesondere bei geläpftem oder poliertem Feinsteinzeug. Lesen Sie die Gebrauchsanleitungen. Was die normale Reinigung betrifft, rät Elios Ceramica vom Gebrauch von Wachsen, öligen Seifen oder imprägnierenden Produkten ab. Es wird hingegen – nur bei poliertem Feinsteinzeug - die Verwendung von Bleichmittel und Ammoniak empfohlen, die entsprechend in Wasser verdünnt werden, mit anschließendem Trocknen des Fußbodens, damit sich keine Ränder bilden. Es wird darauf hingewiesen, dass die oben genannten Vorschriften nicht das Reinigen von Gummispuren (Schuhe, Absätze, Stuhlbeine usw.) vorsieht, insbesondere in Räumlichkeiten, in denen diese Phänomene eher möglich sind bzw. wiederholt auftreten. Allgemein wird die Oberfläche durch das Polieren oder Läppen glänzender und trägt dabei einen Teil des Materials ab, was wiederum Mikroporen öffnet, die das Produkt fleckenempfindlicher werden lassen. Aus diesem Grund haftet Elios Ceramica nicht bei diesen Produkten. Wir möchten darauf hinweisen, dass einfarbige Produkte mit sehr hellen Farben, vor allem bei Weiß oder Extraweiß, bei einigen Fleckentypen sehr empfindlich sind, da diese hier deutlichere Spuren oder Ränder als bei nicht so hellen Produkten hinterlassen können. Es muss daher berücksichtigt werden, dass diese Flecken eine sehr sorgfältige und schnelle Reinigung nach sich ziehen. Die normale Wartung muss notwendigerweise mit spezifischen Produkten ausgeführt werden, die die Zeichen oder Flecken entfernen (siehe Tabelle "Reinigungsprodukte"). Für alle Farben und vor allem bei weißen Farben ist die Reinigung nach der Verlegung besonders wichtig, um alle Stuckreste zu entfernen, die einen Zementfilm bilden können, der jede Art von Schmutz aufnimmt und die Verschmutzung des Produkts erleichtert. Allgemein kann eine unangemessen oder späte Reinigung des Keramikmaterials zu schweren Schmutzproblemen führen, die nur schwer bei einer späteren Reinigung zu beseitigen sind. In diesen Fällen weist Elios Ceramica jegliche Verantwortung zurück. Wie bitten Sie, unsere Datenblätter "Reinigungsprodukte" zu lesen.

En el caso de manchas especiales y/o particularmente persistentes, se recomienda usar detergentes específicos. Es importante realizar siempre una prueba en una baldosa antes de usar el producto, en particular en gres porcelánico lapeado o pulido, y leer las instrucciones de uso. En cuanto a la limpieza corriente, Elios Ceramica desaconseja el uso de ceras, jabones aceitosos y productos de impregnación. En su lugar, se recomienda usar lejía y amoníaco, diluidos apropiadamente en agua, con el posterior secado del pavimento en el caso del gres porcelánico pulido, para evitar la visibilidad de los halos.

Se señala que las normas mencionadas más arriba no prevén la limpieza de rastros de goma (zapatos, tacones, tapones de silla, etc.) en particular en espacios donde estos fenómenos son más posibles y repetitivos. En general, sin embargo, el proceso específico de pulido o lapeado hace que la superficie sea más brillante eliminando una parte del material y, por tanto, abriendo microporos en la superficie, lo que hace que el producto sea más vulnerable a las manchas. Por lo tanto, Elios Ceramica declina toda responsabilidad por estos productos.

Nos gustaría subrayar que los productos de color sólido que son muy claros y aún más de color blanco o extrablanco son relativamente delicados en cualquier superficie respecto a ciertos tipos de manchas, ya que estas pueden dejar rastros o halos más visibles que en productos menos claros. Por lo tanto, debe tenerse en cuenta que tales manchas requieren un mantenimiento más cuidadoso y una limpieza lo antes posible. El mantenimiento ordinario debe realizarse necesariamente con productos específicos destinados a eliminar marcas o manchas (ver la tabla "productos de limpieza"). Para todos los colores y en particular para los colores blancos, la primera limpieza posterior a la instalación es extremadamente importante para eliminar por completo los residuos de relleno de juntas, que pueden crear una película de cemento capaz de absorber todo tipo de suciedad y que facilitan que el producto se ensucie. En general, en estos productos, una limpieza inadecuada o tardía del material cerámico puede causar graves problemas de suciedad, difícil de eliminar por completo con una limpieza posterior. En estos casos, Elios Ceramica declina toda responsabilidad. Le invitamos a consultar nuestra hoja de “productos de limpieza”.

- 1** The sale will be governed by the general terms of sale listed here below and, for all what is not expressly stated herewith, by the Italian Civil Law.
- 2** The Customer's order is intended as a purchase proposal, it is irrevocable for the Customer and is not binding for the Seller, who reserves the right to accept it after inquiring about the Customer in the ways he will deem it opportune to.
- 3** The sales contract will be intended as validly stipulated only upon the receipt by the Customer of a written order confirmation from the Seller. Any eventual addition or modification to the order, even if given through agents of the Seller's, will not be binding for the Seller himself, who may accepted or refuse them without any prejudice for the original order.
- 4** The given delivery time is to be intended as approximate, a 90 days allowance over the stated terms is granted to the Seller. The Seller, however, will not be held for responsible if the non-observance of the stipulated terms as well as of the allowance one will be due to strikes, unavailability of raw materials, natural disasters, fire, or any other event not imputable to the Seller.
- 5** The goods are intended as sold "ex Seller's works" and delivered on means of transport of the Customer's or of an appointee of his. The eventual research of a means of conveyance by the Seller is to be intended as done on behalf and to the interest of the Customer, without any responsibility. The eventual conglobation of the cost of transport in the selling price, or the clause "free building yard" will never be intended as a derogation from this clause. Eventual losses, averages, damages to the goods end to packing will therefore remain to the Customer's charge irrespectively of the reasons or events that might cause them, and this even if, upon request of the carrier, the Seller should have given statements of guarantee. For no reason the Customer can refuse to clear the arriving goods.
- 6** The relevant price shall be paid in accordance with the agreed conditions and within the agreed date. Payments made to the Seller's agents shall not be considered releasing for the Customer unless previously authorised in writing by the Seller. After payment expiry dates, interest on delayed payment shall become due at the rate of 5 percentage points above the official bank rate in effect on the date of expiry of the payment.
- 7** The partial or total unfulfillment of even one payment only, when due, involves the Customer's loss of the benefits of the term and the legal cancellation of the contract as well as any other contract between the parties, according to the art. no. 1456 of the Italian Civil Law. Before stating his will to enforce this resolutive clause, however, the Seller will be entitled to stop all pending deliveries, even if referred to other contracts stipulated.
- 8** The Seller reserves the right to withdraw from the contract if, after the confirmation of the order, he should receive such commercial information about the Customer as to discourage him from executing the contract, and this in his unobjectable judgement; the enforcement of this right will not entitle the Customer to any compensation for damages or other.
- 9** The customer will not be allowed to place or resell the goods covered by the contract in areas where the Seller's product is already notoriously distributed by other Companies and, in case of default, the contract will be intended as legally rescinded, according to the art. no. 1456 of the Italian Civil Law.
- 10** The Customer agrees that there may be variations in the shape, intensity, colour, shade or other visual features of the goods and that the absolute uniformity of these features is not guaranteed by the Seller. The Customer also agrees that the product bought by sample may vary in its visual features, from the sample itself in the same way and to the same extent to which the whole production of the Seller may vary.
- 11** Orders of goods of a lower choice than the first one are subject to the availability of the goods and, if confirmed, are intended without indication of the delivery time. In case of order for goods of first choice, the absolute uniformity of the quality is not guaranteed and the inclusion of goods of a lower quantity is allowed up to an extent of 5%.
- 12** Within eight days from the receipt of the goods the Customer should check them and send eventual claims directly to the Seller by registered letter or fax, under pain of losing the benefits of the guarantee. Eventual hidden defects of the goods should be denounced, in the same way as stated here above, within 8 days from their discovery and, however, not later than 6 months from the delivery, under pain of forfeiture of the guarantee. The Customer will also lose the benefits of the guarantee if, after presenting his claim in due time, he does not keep the goods at the Seller's disposal during 30 days at least, or if it uses them. The goods of a lower choice than the first one are sold without any guarantee.

- 13** The Seller's responsibility for eventual defects of the sold goods, provided that these have been duly claimed and recognized, is limited only to the free replacement of the defective material, the repayment of any direct or indirect damage incurred by the Customer being however excluded.
- 14** Irrespectively of the Customer's nationality and residence, this contract is subjected to the competence of the Italian Court.
- 15** Any dispute arising between the parties from the interpretation or the execution of this contract will be referred for settlement to the competent Court of Modena.
- 16** Any unfulfillment of the Customer will immediately entitle the Seller to entrust a Lawyer to take necessary steps to recover the money. After the appointment of the Lawyer the Customer shall have to pay to the Seller, as lump repayment of legal charges, 30% of the whole debtor, in any case a minimum of € 155,00.
- 17** The sale is made subject property under article 1523 DC which states that goods will become the buyer's property only when full payment will be fulfilled. With the acceptance of the acceptance of the delivery of the goods all risks are assumed by you.
