UNA CERAMICA CHE ARRIVA DA LONTANO

A COMPANY WITH A LONG HISTORY
EINE KERAMIK, DIE AUS DER FERNE KOMMT
UNE CÉRAMIQUE QUI VIENT DE LOIN

IT_ Ceramica del Conca S.p.a. è nata nel 1979 per iniziativa di una imprenditoria maturata in campo edilizio in Italia ed all'estero, nuova al mondo delle piastrelle ma sensibile alle evoluzioni tecnologiche, al design e alle crescenti aspettative del mercato. Fu tra le prime aziende del settore ceramico a credere nella monocottura smaltata su gres ceramico bianco, così come fu fra le prime ad impiegare la tecnologia del gres porcellanato, operando con determinazione valide scelte impiantistiche in momenti di generale incertezza in campo tecnico.

Dopo gli importanti investimenti degli ultimi anni l'azienda oggi è in grado di soddisfare, con le sue moderne linee di prodotto, tutte le esigenze estetiche, qualitative e progettuali.

EN_ Ceramica del Conca S.p.a. was founded in 1979, based on experience in the construction sector in Italy and abroad. At the time, it was new to the world of ceramic tiles but had a great interest in technological development and design and was aligned with growing market expectations. It was one of the first companies in the ceramic tile industry to believe in glazed single-fired white body stoneware, and at times of general technical uncertainty, it was also one of the first to adopt the porcelain stoneware technology, making brave and valid production choices. Following major investments in recent years, the company can now satisfy all the aesthetic, quality and design requirements with its modern product lines.

DE_ Die Ceramica del Conca S.p.a. ist 1979 auf Initiative eines im Baubereich in Italien und im Ausland herangereiften Unternehmertums, das neu im Bereich der Fliesen war, aber gegenüber den technologischen Entwicklungen, dem Design und den wachsenden Erwartungen des Marktes sensibel war. Sie gehörte zu den ersten Unternehmen im Fachbereich der Keramik, die an das glasierte Steinzeug auf weißem Steinzeug glaubte, wie es zu den ersten gehörte, die die Technologie des Feinsteinzeugs einsetzte und zu Zeitpunkten einer allgemeinen Unsicherheit im technischen Bereich mit Bestimmtheit gute Entscheidungen bezüglich der Anlagentechnik traf. Nach den großen Investitionen der vergangenen Jahre ist das Unternehmen heute in der Lage, mit seinen modernen Produktlinien alle ästhetischen, qualitativen und planerischen Erfordernisse zu erfüllen.

FR_ Novice dans le monde des carreaux mais sensible aux évolutions technologiques, au design et aux attentes croissantes du marché, Ceramica del Conca S.p.a. a vu le jour en 1979, avec un esprit d'entreprise acquis dans le secteur du bâtiment en Italie à l'étranger. Elle fut une des premières sociétés du secteur de la céramique à croire en la monocuisson émaillée sur du grès cérame blanc, et la première à utiliser la technologie du grès cérame, en effectuant avec détermination des choix valables en matière d'installation à une époque d'incertitude générale dans le domaine technique. Grâce aux investissements importants des dernières années, la société est aujourd'hui en mesure de satisfaire toutes les exigences esthétiques, qualitatives et conceptuelles avec ses lignes de produits modernes.

The company's environmental philosophy is attentive to the environment and to people's well-being and is based on the complete internal re-use of the industrial water produced during the company and third-party's processing cycles, the reduction of CO₂ emissions into the atmosphere in line with the requirements of the Kyoto Protocol, the recovery in the production cycle of all non-fired production waste and correct waste management.

DE_ Der Schutz der Umwelt, der natürlichen Ressourcen sowie die Begrenzung des Energieverbrauchs ist seit jeher ein Ziel, das das Unternehmen konstant und aufmerksam verfolgt, um seinen Kunden ein Produkt zu liefern, das nicht nur ästhetische und technische Eigenschaften von hohem Niveau hat, sondern auch gemäß Kriterien der Nachhaltigkeit hergestellt wurde. Die Umweltschutzpolitik wird durch die Sensibilisierung der eigenen Beschäftigten und Lieferanten gegenüber Themen der Ökologie und der Energieeinsparung angewandt. Die vollständige interne Wiederverwendung des während des eigenen und bei Dritten erfolgenden Bearbeitungszyklus entstehenden Brauchwassers, die Reduzierung der CO₂-Emissionen in die Atmosphäre gemäß den Forderungen des Protokolls von Kyoto, die Rückgewinnung aller ungebrannten Produktionsabfälle im Produktionszyklus und eine getrennte Abfallentsorgung sind die wichtigsten Elemente, die die Grundlage einer auf die Umwelt und das Wohlbefinden der Personen bedachten Philosophie bilden.

FR_ Le respect de l'environnement, des ressources naturelles ainsi que les économies d'énergie sont depuis toujours un objectif que la société suit avec constance et attention, pour fournir à ses clients un produit qui présente des caractéristiques esthétiques et techniques de haut niveau et qui est réalisé suivant des critères de durabilité. La politique environnementale est mise en œuvre en sensibilisant les salariés et les fournisseurs aux thèmes de l'écologie et de l'économie d'énergie. La réutilisation intégrale en interne des eaux industrielles produites durant son cycle de production et celui de tiers, la réduction des émissions de CO₂ dans l'atmosphère en ligne avec le Protocole de Kyoto, la récupération au cours du cycle de production de tous les déchets de production non cuits et une gestion différenciée des déchets constituent les principaux éléments à la base d'une philosophie attentive à l'environnement et au bien-être des personnes.

IT_ Il Gruppo Del Conca è da sempre attivo in ambito sociale anche grazie alla Fondazione Cino Mularoni, che ha come scopo l'attuazione di eventi di carattere culturale e scientifico, favorendo studi e ricerche, contribuendo alla formazione di giovani studiosi e al sostegno di diverse iniziative editoriali. Il Gruppo Del Conca impiega risorse umane ed economiche per promuovere molteplici attività filantropiche, ottenendo risultati concreti in campo umanitario con progetti di solidarietà in tutto il mondo. Sin dal primo progetto realizzato in Indonesia nel 2008 è stata considerata l'importanza dell'istruzione e della salute come base per uno sviluppo sociale ed economico di tutti i paesi più poveri del mondo e, da allora, l'impegno è stato verso questa direzione con la costruzione di scuole, case famiglia, reti idriche, centri sanitari e reparti ospedalieri. Non è mancato il sostegno alle popolazioni fortemente colpite dal terremoto in Italia nel 2012 e 2016.

EN_ The Del Conca Group has always been active in the social sphere also thanks to the Cino Mularoni Foundation, which aims to organise cultural and scientific events, encouraging studies and research and contributing to the training of young scholars and to supporting various publishing activities. The Del Conca Group employs human and economic resources to promote a wide number of philanthropic activities, obtaining concrete results in the humanitarian field with solidarity projects all over the world. Since the first project carried out in Indonesia in 2008, the focus has been on the importance of health and education as a basis for social and economic development of all the poorest countries in the world; since then the company has fully committed to this mission and has moved in that direction through the construction of schools, family houses, water networks, health centres and hospital wards. Support was also provided to the populations strongly affected by the earthquakes in Italy in 2012 and 2016.

DE_ Die Gruppe Del Conca ist seit jeher auch durch die Stiftung Cino Mularoni im sozialen Bereich aktiv, deren Zweck die Durchführung von Veranstaltungen kultureller und wissenschaftlicher Art, die Förderung von Studien und Forschung, der Beitrag zur Ausbildung von jungen Wissenschaftlern und die Unterstützung verschiedener Verlagsinitiativen ist. Die Gruppe Del Conca setzt Personal und Mittel ein, um zahlreiche philanthropische Tätigkeiten zu fördern, wobei sie konkrete Ergebnisse im humanitären Bereich mit Solidaritätsprojekten in der ganzen Welt erzielt. Seit dem ersten, in Indonesien im Jahre 2008 durchgeführten Vorhaben, wurde die Bedeutung von Ausbildung und der Gesundheit als Grundlage für soziale und wirtschaftliche Entwicklung in allen der ärmsten Länder der Welt erkannt, und seit jeher ging das Bestreben mit dem Bau von Schulen, Kinderheimen, Wassernetzen, Gesundheitszentren und Krankenhausbteilungen in diese Richtung. Die Unterstützung für die Erdbebenopfer 2012 und 2016 in Italien fehlte nicht.

FR_ Le Groupe Del Conca est depuis toujours actif dans le social également grâce à la Fondation Cino Mularoni, dont l'objectif est la mise en œuvre d'événements de caractère culturel et scientifique, en favorisant les études et les recherches, en contribuant à la formation de jeunes chercheurs et au soutien de différentes initiatives éditoriales. Le Groupe Del Conca utilise des ressources humaines et économiques pour promouvoir de nombreuses activités philanthropiques, en obtenant des résultats concrets dans le domaine humanitaire avec des projets de solidarité dans le monde entier. Depuis le premier projet réalisé en Indonésie en 2008, on considère que l'instruction et la santé constituent la base d'un développement social et économique de tous les pays les plus pauvres du monde et depuis, nous nous sommes engagés dans ce sens, en construisant des écoles, des maisons d'accueil, des réseaux de distribution de l'eau, des centres sanitaires et des services d'hôpitaux. Nous soutenons également la population italienne fortement frappée par les séismes de 2012 et 2016.

Il decoro è stato realizzato con oro giallo e materie metallizzate pertanto il fondo decorato può essere posato solo a parete. Il decoro non è resistente all'usura da sfregamento sia in fase di posa che post posa. Per la pulizia quotidiana si consiglia di utilizzare un panno umido impregnato di acqua o prodotti neutri.

The decoration was created with yellow gold and metallised materials and therefore the decorated background tiles can only be laid on walls. The decoration is not resistant to rubbing wear either during installation or post installation. For daily cleaning, it is advisable to use a wet cloth soaked in water or neutral detergents.

Das Dekor wurde mit Gelbgold und metallisierten Materialien hergestellt, deshalb kann die dekorierte Bodenfliese nur an der Wand verlegt werden. Das Dekor ist sowohl bei der Verlegung als danach gegen Scheuern nicht abnutzungsbeständig. Zur täglichen Reinigung wird geraten, ein feuchtes, mit Wasser oder neutralen Reinigungsmitteln imprägniertes Tuch zu verwenden.

Le décor a été réalisé avec de l'or jaune et des matières métallisées; par conséquent, le fond décoré ne peut être posé que sur le mur. Le décor n'est pas résistant à l'usure par frottement pendant et après la pose. Pour le nettoyage quotidien, nous recommandons d'utiliser un chiffon humide imprégné d'eau ou de produits neutres.

Per creare l'angolo è sufficiente tagliare due fondi greca in diagonale "in due direzioni opposte" e accostare i due lati opposti tagliati con il bordo nero. Vedi disegno.

To create the corner, simply remove two Greek backgrounds diagonally and bring the two sides together with black graphics.

Um eine Ecke zu gestalten genügt es, zwei Bodenfliesen mit Mäander diagonal zu verlegen und am dem beiden Seiten an eine schwarze Grafik anzulegen.

Pour créer l'angle il suffit de couper à 45° deux décors Greca en deux sens opposés et placer les deux côtés coupés opposés avec le bord noir. Voir schéma.

CARACTERISTIQUES TECHNIQUES ET NORMES INTERNATIONALES

Le nostre piastrelle di 1° scelta sono prodotte e scelte in base alla normativa europea EN ed internazionale ISO. Questa significa che il 95% delle piastrelle contenute nelle confezioni di prima scelta devono avere caratteristiche d'aspetto conformi alla norma; pertanto non devono essere perfette (cosa impossibile per un qualunque prodotto industriale) ma devono avere delle tolleranze contenute entro i limiti della norma.

Queste tolleranze e quelle relative alle altre caratteristiche fisiche e chimiche del prodotto sono riportate in calce. La valutazione dell'aspetto della piastrella deve essere fatta osservandola perpendicolarmente da 1 m. di distanza. I difetti delle piastrelle possono essere di due tipi: palesi (visibili già prima della posa, come differenza di tonalità, difetti di superficie, rotture, ecc.) o occulti (non visibili prima della posa).

I difetti palesi vanno contestati solo prima della posa. Questo consente al produttore di sostituire eventualmente il materiale difettoso.

Qualora l'acquirente o l'installatore decidano comunque la messa in opera, la responsabilità del produttore decade.

La responsabilità per difetti occulti, purché contestati entro i termini di legge, è del produttore.

Our 1st choice tiles are manufactured and selected according to European EN and International ISO regulations. This means that 95% of the contents of first choice must have appearance characteristics corresponding to the standards.

Therefore they must not be perfect (which is impossible for any industrial product) but must have tolerances comprised within the standard limits. These tolerances and those concerning the other physical and chemical characteristics of the product are reported below.

The appearance valuation of the tile must be done examining it (perpendicularly) from 1 meter of distance.

Defects of tiles can be of two types: noticeable (already visible before laying, such as color differences, surface defects, fractures, etc) or hidden (not visible before laying). Complaints about noticeable defects may be made only before tiles are laid, allowing the producer to replace any faulty material. However, if the buyer or tile layer decides to proceed with laying, the responsibility of the producer is invalidated.

Responsibility for hidden defects, if these are notified within the legal time limits, lies the producer.

Unsere Produkte in 1. Sortierung entsprechen den Europaischen EN- und den internationalen ISO-Normen. Dies bedeutet, daß 95% des Inhaltes einer als "erste Wahl" deklarierten Verpackungseinheit im Aussehen der Norm entsprechen sollen, also nicht perfekt sein müssen (uner-reichbar für jegliches industriell hergestellte Produkt), jedoch Toleranzen innerhalb der von der Norm vorgelegten Limita aufweisen dürfen.

Diese Toleranzen, sowie jene bezogen auf weitere physikalische und chemische Eigenschaften des Produktes werden nachfolgend aufgeführt. Das Aussehen der Fliesen sollte beurteilt werden wenn man sie in 1 m. Entfernung in Senkrechter position betrachtet. Fliesen können Mängel zweierlei Typs aufweisen: offensichtliche, schon vor dem Verlegen zu bemerkende Mängel, wie Tonalität-differenzen, Oberflächenfehler, Bruch usw... sowie versteckte, nicht vor der Verarbeitung zu bemerkende Mängel. Offensichtliche Mängel sind vor dem Verlegen zu beanstanden. Dies erlaubt dem Hersteller eventuell das Mängel aufweisende Material zu ersetzen. Sollten der Käufer oder der Fliesenleger sich dennoch für eine Verlegung des zu bemängelnden Materiales entscheiden, entfaellt die Verantwortung des Produzenten. Verantwortung für versteckte Mängel trägt der Hersteller, jedoch nur bei Beanstandung im Rahmen der gesetzlichen Fristen.

Nos carreaux de 1er choix sont produits et choisis en fonction des normes européennes EN et des normes internationales ISO. Ceci signifie que 95% des carreaux contenus dans les conditionnements de 1er choix doivent avoir les caractéristiques d'aspect conformes aux normes. Ils ne doivent donc pas être parfaits (chose impossible pour tout produit industriel) mais ils doivent avoir des tolérances contenues dans les limites des normes. Ces tolérances et celles relatives aux autres caractéristiques physiques et chimiques du produit sont reportées ci-dessous. L'évaluation de l'aspect du carreau doit être faite en observant celui-ci (perpendiculairement) à un mètre de distance. Les défauts des carreaux peuvent être de deux types: visibles (déjà avant la pose, comme différences de tonalité, défauts de surface, rupture, etc...) ou cachés (non visibles avant la pose). Les défauts visibles ne peuvent être contestés qu'avant la pose. Ceci consent au producteur de remplacer éventuellement le matériel défectueux. Au cas où l'acheteur ou le carreleur décide quand même l'installation, le producteur n'est plus responsable.

La responsabilité pour défauts cachés est celle du producteur, à condition que la marchandise soit contestée dans les délais légaux.

CONSIGLI PER L'IMPIEGO • RECOMMENDATIONS FOR USE • EMPFEHLUNGEN FÜR DEN GEBRAUCH • CONSEILS POUR L'EMPLOI

I risultati delle prove di laboratorio non sono sufficienti a determinare la durata di un pavimento. A parità di calpestio essa è influenzata oltre che dalle caratteristiche tecniche del prodotto, anche dal luogo di impiego e della maggiore o minore presenza di sostanze abrasive. Pertanto consigliamo di scegliere il prodotto con le caratteristiche di resistenza all'usura sufficienti all'utilizzo in base allo schema che segue ma anche di proteggere, ad esempio con l'utilizzo di zerbini, i pavimenti dalla presenza di sabbia o sostanze graffianti.

No laboratory test, however efficient it may be, is sufficient to determine the durability of a product. Apart from the obvious factor of the number of foot contacts, durability can also be influenced by the technical characteristics of the product, the place of installation and the possible presence of abrasive agents. We therefore recommend not only that products should be chosen with resistance characteristics that are sufficient for the intended use, as shown in the following chart, but also that wherever necessary, floors should be protected against sand, grit and other abrasives by the use, for example, of mats.

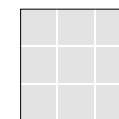

Die Resultate von Laborversuchen reichen nicht aus, um die Lebens-dauer eines Fußbodens zu bestimmen. In gleichem Maße wie durch Begehung, ist er - außer durch die technischen Charakteristiken des Produktes - auch durch den Verwendungsort und die dort vorhandene größere oder geringere Menge schleifender Substanzen beeinflusst. Deshalb empfehlen wir die Auswahl des Produktes nach solchen Haltbarkeitscharakteristiken, wie sie das folgende Schema darlegt, und außerdem, die Fußböden z. B. durch Gebrauch von Fußmatten vor Sand oder kratzenden Substanzen zu schützen.

Les résultats des essais de laboratoire ne peuvent à eux seuls déterminer la durée d'un pavement. A parité de passage, celle-ci, outre à dépendre des caractéristiques techniques du produit, dépend aussi du lieu d'emploi et de la présence plus ou moins importante de substances abrasives. Pour cela, nous conseillons de choisir le produit présentant des caractéristiques de résistance à l'usure en rapport avec l'utilisation à laquelle il est destiné sur la base du schéma reporté ci-après et de protéger les pavements, à l'aide de paillasons ou autre, du sable ou de toute substance pouvant les rayer.
