

mykonos

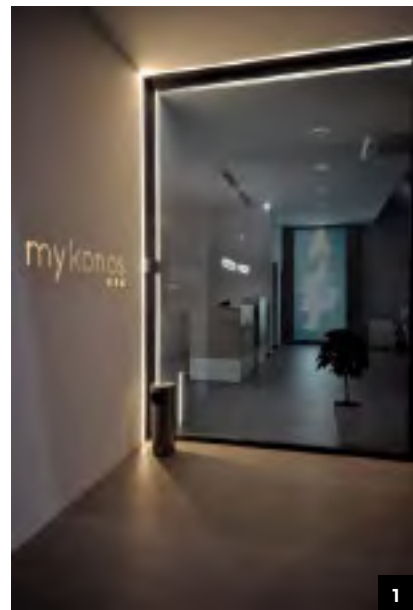

Somos una empresa de profesionales ceramistas en continuo movimiento en dirección a un único destino: ofrecerte de forma continuada una cerámica de calidad, con amplitud de formatos, acabados y un servicio con más valor. De ahí nuestra determinación en crecer contigo con más innovación y desarrollo de productos, de iniciativas y proyectos. Las personas valientes caminan hacia adelante sin miedo, con la pasión y con la energía de quien quiere crear y hacerte llegar productos cerámicos más competitivos en calidad y versatilidad. Cada día más cerca de ti, cada día más cerca de que el diseño cerámico esté al alcance de la mayoría. Gracias por tu confianza.

*We are a company of ceramic professionals constantly moving towards our one and only goal: to offer our clients a product range and a customer service of high value, season after season. Thus, our determination to innovate and develop new decorative products lead us to improve people's quality of life with different initiatives and new projects. Brave people walk forward without fear but with the passion and energy of those who want to make products not only with the highest quality, but with a great versatility. Each day closer to you. Each day closer to get ceramic design within everyone's reach. Thank you for trusting us.*

# CERÁMICA DE GRAN FORMATO

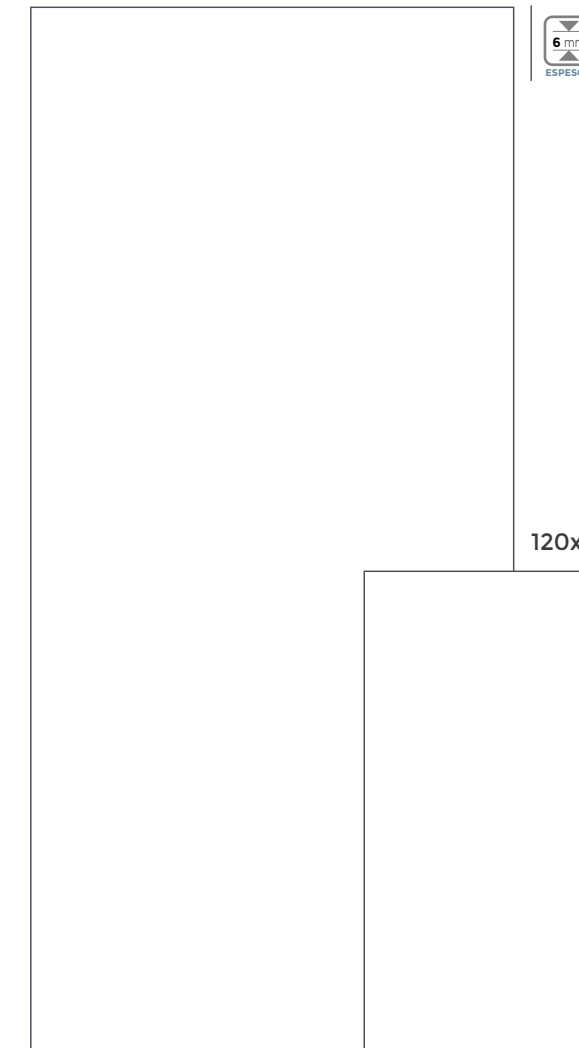

## LARGE FORMAT TILES

La creatividad XXL soñando en mayúsculas y la exigencia real de quienes buscan darle forma a la excelencia van de la mano en estos diseños cerámicos de gran formato que visten más decoración, más arquitectura, más interiorismo, más textura, ... más esencia **Mykonos**.

*The needs of those who seek to define excellence go hand to hand with our XL-sized dreams in the design of large format tiles that are aimed to be more suitable for decoration, interior design and architecture. SUPRA is more texture, more relieve, more essence and more **Mykonos** as ever.*

Debido a su extraordinaria resistencia la serie Technic esta indicada para superficies comerciales, centros de trabajo o edificios públicos, pero también ofrece todo su potencial para espacios residenciales. Gracias a sus características y cualidades estéticas ofrece un comportamiento excelente para el recubrimiento de fachadas.

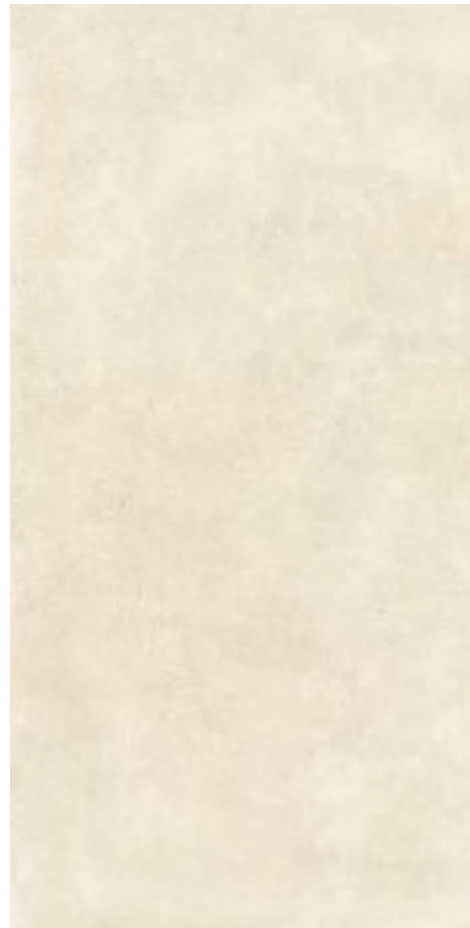

*Due to its extraordinary resistance, Technic series is suitable for all kinds of highly frequented areas, such as commercial areas or public buildings, but it offers its great potential for residential areas as well. Together with its endurance, its great looks make it an excellent choice for facade cladding.*

The background of the entire page is a close-up photograph of a marble surface. The marble has a light cream or off-white base color, with prominent, flowing veins in shades of grey, taupe, and light brown. The veins are irregular and create a sense of depth and texture. The lighting is soft, highlighting the natural grain and subtle variations in the stone's color.

## VENTAJAS

Protege de los agentes atmosféricos: lluvia, sol, aire, etc.

Evita la aparición de humedades y previene las condensaciones internas.

Ayuda en la reducción de la expansión térmica y mitiga los puentes térmicos.

Proporciona un gran ahorro energético.

Actúa como un excelente aislante acústico.

Diseño e innovación en edificios.

La fachada ventilada es una solución constructiva que permite recubrir las fachadas con un revestimiento cerámico separado del muro de cierre, pero fijado a él. La cámara resultante queda abierta en puntos estratégicos, normalmente en las juntas, para permitir su ventilación. Esta cámara mejorara las prestaciones del edificio y prolonga su vida útil. Su instalación consiste en la colocación de una estructura de aluminio sobre la fachada de obra, en la que se alojará el sistema de fijación de las piezas cerámicas.

Ventilated facades are constructive solutions that allow the attaching of tiles to the enclosing wall of a building, leaving some space between them. This space will be open in some strategic points, usually in the joints so air circulates easily. A ventilated facade highly improves the performance of a building, extending its lifetime. The installation consists in hanging an aluminum structure on the wall, which contains a fastening system to affix the tiles to it.

## SISTEMA DE COLOCACIÓN | PLACEMENT SYSTEM

Desde **Mykonos** aconsejamos cualquiera de los siguientes sistemas para la colocación de las piezas cerámicas en las fachadas

**R1** Este sistema integral es un sistema de fijación longitudinal de oculta mixta (mecánica y química) que trabaja por la compresión ejercida por el sistema sobre el dorso de la placa. Dos pares de ranuras en el dorso de la placa permiten la inserción de unos perfiles de aluminio que fijados mediante tornillos de acero inoxidable, da como resultado un todo solidario. El sistema evita el posible riesgo de desprendimiento en caso de rotura, por esta razón este sistema se puede considerar el sistema más seguro de cuantos existen en el mercado. Además, prevé la reposición, en caso de ser necesario, de una sola placa.

**R5** Es un sistema de fijación longitudinal oculto mixto (mecánico y químico). Aporta un alto grado de fiabilidad debido a su anclaje longitudinal mecánico sumado a las ventajas que aportan los adhesivos elásticos que permiten la libre dilatación de la pieza.

Un par de ranuras en el dorso de la placa, una en la zona superior y otra en la zona inferior, permiten el alojamiento de dos perfiles diferenciados. El superior es el encargado de transmitir las cargas a la estructura primaria, mientras que el inferior retiene la placa en un único plano.

No precisa de una estructura secundaria, puesto que el perfil de cuelgue hace la función de perfil horizontal. Este perfil de cuelgue queda fijado a la estructura primaria mediante tornillos autotaladrantes de acero inoxidable, de manera que nos garantiza una sujeción muy fiable.

Además, este sistema prevé la reposición en caso de ser necesario, tanto de una sola pieza como la regulación de estas una a una por descuadre.

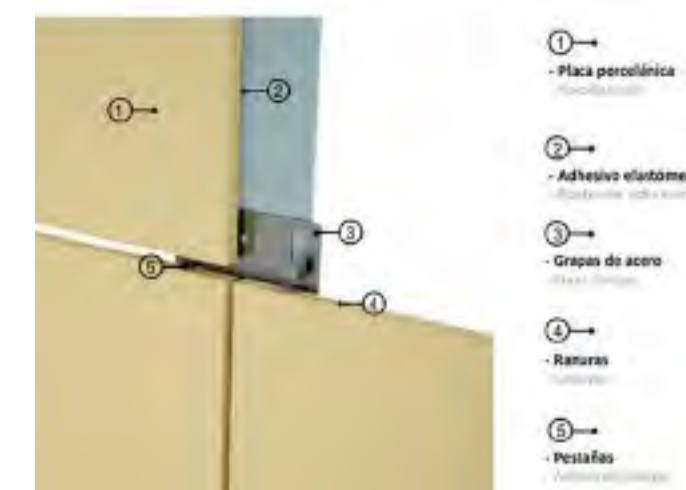

**R3 oculto** ERediwa C.A.T. 3 para cubrir fachadas ventiladas es un sistema de fijación mecánica química oculta y longitudinal. El dispositivo de fijación mecánica oculto está fabricado con clip de acero inoxidable atornillado a la estructura vertical. La cerámica se mantiene en su posición mediante estos clips de acero, ya que sus bridas se insertan en las ranuras previamente realizadas en los bordes cerámicos. Estas ranuras están fabricadas con una máquina industrial bajo los más altos niveles de control de seguridad, para garantizar que tanto la profundidad como el ancho de las ranuras cumplen con los estándares.

En la superficie crítica entre la costilla de la baldosa cerámica y la subestructura vertical, en forma longitudinal, se encuentra una cuerda adhesiva elástica tipo MS, que proporciona al sistema una fijación longitudinal química.

Además, la utilización de este adhesivo elástico permite absorber los movimientos del recubrimiento cerámico provocados por el viento (se eliminan los "movimientos de planchas" o vibraciones de las baldosas cerámicas) y por ello la baldosa no está en contacto directo con la estructura, por lo que el adhesivo absorbe las distintas dilataciones entre los diferentes materiales.

Además, esta fijación longitudinal cerámica de la estructura permite que, en caso de rotura accidental de una baldosa de gres por impacto de un tipo u otro, la mayor parte de la cerámica permanezca adherida a la subestructura sin desprenderse.

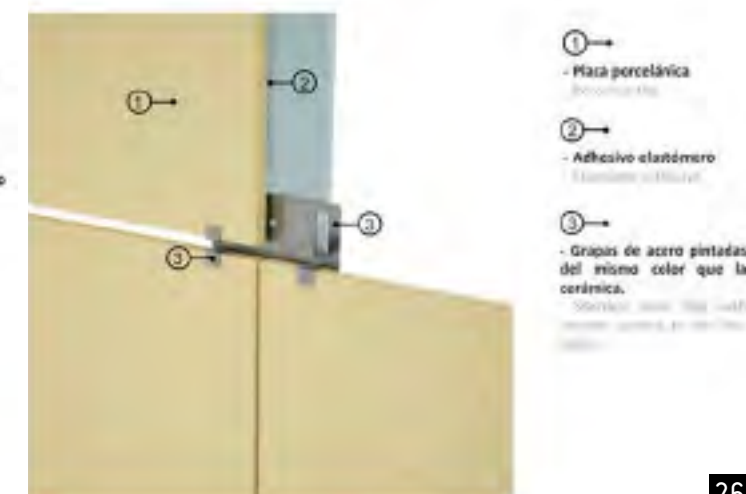

**R3 vista** Es un sistema de fijación visible (grapa vista) que trabaja por la sustentación y retención que ejercen las grapas del sistema sobre los bordes de las placas.

Es un sistema de fijación vista y puntual, para placas rígidas que está pensado y diseñado para obras con aplacado colgado en fachada que precisen de un alto grado de seguridad. Tanto la base de las pestañas de las grapas, están hechas de acero inoxidable. Estas grapas son ancladas a la estructura primaria mediante tornillos de acero inoxidable. Además, para darle una mayor seguridad, las placas cerámicas son selladas a la estructura par reducir el riesgo de desprendimiento.

Esta forma de fijar las grapas a la estructura primaria, hacen que las obras sean, normalmente, de fácil y rápida ejecución.

Está pensado para ser aplicado en material porcelánico de espesores inferiores a 14 mm.

60x60 cm | 23,6"x23,6"

**+2 PLUS**

Los porcelánicos de 20mm de mykonos están indicados para ambientes exteriores tales como caminos de entrada, piscinas, parques y jardines, garajes, zonas urbanas e incluso zonas industriales. Gracias a que no necesita de colas ni juntas para su instalación, entre sus ventajas está su fácil montaje y la posibilidad de ser desmontado y reutilizado. Las baldosas antideslizantes se adaptan perfectamente a las pendientes y poseen un comportamiento ideal ante heladas. Es relevante destacar su gran capacidad de carga mecánica y que no se requiere mantenimiento.

*Our 20-mm porcelain tiles are fit for outdoor spaces, driveways, terraces, swimming pool areas, resorts and spas, parks and gardens, urban areas and even industrial zones. Its characteristics include its easy installation, without adhesives or joints and the fact that it's reusable. Antislip tiles adjust perfectly to the land inclination and weather conditions. It should be noted the great mechanical load capacity and that it has no maintenance.*

El producto ofrece un conjunto de soluciones para su instalación, desde su disposición en seco sobre césped, grava y arena, a la colocación con suelo elevado registrable que permite el acceso a cualquier clase de cables o instalaciones que puedan pasar por debajo de las baldosas.

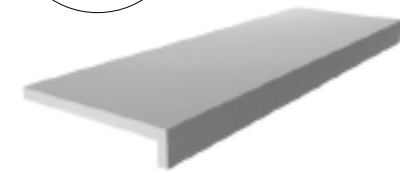

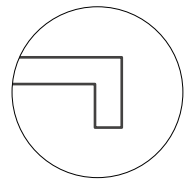

*There are several ways to place the product, from dry disposal on grass, gravel or sand to the use of raised floors, which leaves a gap under the tiles that allow the passage of other kind of installations.*

## PELDAÑOS Y VIERTEAGUAS STEP & RAIN GUTTER

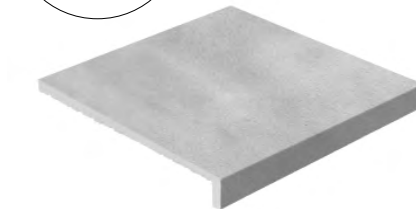

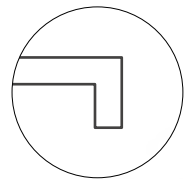

### PELDAÑO ROMO | STEP ROMO

**Medida | Size:** Cualquiera. *Upon request*  
SERIES: Material porcelánico. *All porcelain tiles.*  
Peldaño mecanizado con el canto romo.  
*Mechanized step with romo edge.*

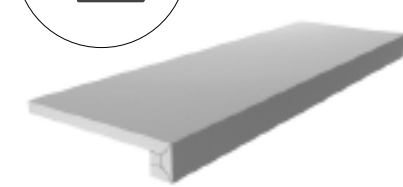

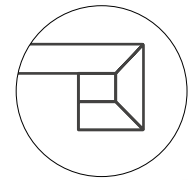

### PELDAÑO FULL | STEP FULL

**33x120 cm | 13"x47,2"**  
SERIES: Bluebell, Irati, Legno cassa.  
Peldaño extrusionado de una sola pieza sin uniones.  
*One-piece, joint-free extruded step.*

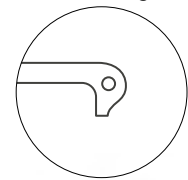

### RECTO | RIGHT

**33x33 cm | 13"x13"**  
SERIES: Silex 33x33 (sand y grey). *Silex sand and grey.*  
Recto extrusionado de una sola pieza sin uniones.  
*One-piece, joint-free extruded step.*

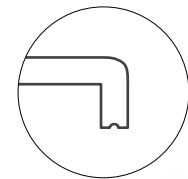

### PELDAÑO GRADONE | STEP GRADONE

**Medida | Size:** Cualquiera. *Upon request*  
SERIES: Material porcelánico. *All porcelain tiles.*  
Peldaño mecanizado, formado por varias piezas cortadas en ángulo, haciendo un refuerzo mayor en el canto.  
*Mechanized step made up of different pieces trimmed in a right angle and reinforced edges.*

### PELDAÑO FIORENTINO | STEP FIORENTINO

**33x33 cm | 13"x13"**  
SERIES: Mustang, Camaro, Dakota, Charger e Impala.  
Peldaño extrusionado de una sola pieza sin uniones.  
*One-piece, joint-free extruded step.*

### VIERTEAGUAS | RAIN GUTTER

**15x33 cm | 5,9"x13"**  
SERIES: Mustang (gris y beig). *Mustang gris and beig.*  
Vieriteaguas extrusionado de una sola pieza sin uniones.  
*One-piece, joint-free extruded step.*

**LIMPIEZA FINAL DE OBRA**

Después de la colocación es fundamental realizar una buena limpieza para eliminar residuos de junta y en general suciedad de la obra.

Para esta operación es aconsejable el empleo de un detergente de acción ligeramente ácida que no despidan humos tóxicos y respete las juntas, el material y el usuario, como Fila Deterdek.

**MANTENIMIENTO**

Para un buen mantenimiento del pavimento se aconseja el empleo de un detergente neutro de alto poder limpiador como Fila-cleaner. En los casos de suciedad orgánica intensa y acumulada en el tiempo, grasas, etc. se aconseja la utilización extraordinaria de un detergente de tipo desengrasante como el Fila PS/87.

**CLEANING AFTER LAYING**

*Cleaning after laying is of fundamental importance for all subsequent procedures and for care operations. The initial cleaning process requires to eliminate all residues from laying process (mortar, adhesive, paint, building-site, dirt of various kinds), and removes any surface waste.*

*For this operation, MYKONOS recommends Deterdek, the acid descaler that does not generate harmful fumes. It removes building-site dirt- mortar, grout and hard deposits of various kinds.*

**MAINTENANCE**

*For routine care, we recommend the use of Filacleaner, that does not damage the surface. It is diluted depending on the level of dirt. When highly diluted, it does not need rinsing. In case of more stubborn dirt, we recommend the use of Filaps/87, the concentrated detergent that can be used as cleaner, degreaser, wax-remover or stain-remover.*

# CERÁMICA SOLIDARIA

## SOLIDARY CERAMICS

Con la intención de poner nuestro granito de arena y colaborar en causas que afectan a nuestra sociedad, adquirimos un firme compromiso con la lucha contra el cáncer aportando el 1% de la facturación de las series Milán y Turín a la Asociación Española contra el Cáncer para contribuir a su prevención e investigación.

¿Por qué TURIN y MILÁN? Porque son dos series que hemos desarrollado con mucho cariño y pensamos que a través de ellas podemos recaudar más fondos para la lucha activa contra esta enfermedad. Ayúdanos a ayudar.

*With the sole intention of doing our bit and collaborating with a cause that's so close to our hearts, we engaged with the fight against cancer donating 1% of profits from sales of Milan and Turin series to the Spanish Association Against Cancer to help prevention and increase funds for research.*

*Why Turin and Milan series? They were developed with all our love and became two of our most successful series, so that's why we chose them, to contribute as much we can to the cause.*

*Join the fight !*

## TURIN

60x60 cm | 23,6"x23,6" 28x70 cm | 11"x27,55"

GRIS | PERLA | CREMA | TAUPE

## MILAN

60x60 cm | 23,6"x23,6" 28x70 cm | 11"x27,55"

GRIS | PERLA | CREMA | TAUPE
