ADZ / Anti-slipping floor tiles
Pavimento ADZ

Contac-grip. Anti-slipping surface treatment applied after tile firing. This treatment is subject to material characteristics, colour, quantity and delivery date conditions. Contac-grip. Tratamiento superficial antideslizante aplicado después de la cocción. Sujeto a condiciones de modelo, color, cantidad y suministro.

Non-slip flooring with soft texture and easy to clean. Unique texture to use in both indoors and outdoors with a high non-slip performance. Pavimento anti-deslizante con una textura suave y fácil de limpiar. Una única textura para aplicar tanto en interior como en exterior con altas prestaciones antideslizantes.

The material is Pre-sealed, so we recommend to seal the material once it has been installed and it has been properly cleaned. Black grout (containing carbon or graphite) must not be used with polished glazed porcelain tiles because the pigments could stain the tile surface. El material está pre-sellado, por lo que aconsejamos el sellado del material una vez esté instalado y debidamente limpio. El uso de lechadas / juntas de colocación negras (contienen carbono o grafito) para gres porcelánico pulido es desaconsejable, ya que los pigmentos pueden formar un depósito en la superficie de la baldosa.

TECHNICAL SOLUTIONS / SOLUCIONES TÉCNICAS

Adhesion, understood as the strength of the bond between the ceramic piece and the base, plays a vital role in the quality of the tiled surface. Good adhesion should guarantee that the tile is firmly fixed to the base. The development of new low porosity ceramic materials that are resistant to abrasion and sub-zero temperatures, large formats, and their installation in industrial or large commercial areas, facades, etc., has led to a corresponding development in adhesive products.

Increased knowledge about the use of special adhesives means that thick layer installation (mechanical adhesion) is being replaced by thin layer installation (chemical adhesion); the latter offers clear advantages, particularly in relation to quality of both adhesion and durability. The appropriate adhesive must be chosen, taking into account the surface to be tiled and the type of ceramic tile.

It is very important to use the right tools when laying the tiles (notched trowel, white rubber mallet, spirit level and suction cup). The substrate on which the tiles are to be laid must also be free of any plaster, paint residues etc., thus enabling the adhesive to be effective over time.

The adhesive manufacturer's instructions must be followed at all times.

La adherencia, considerada como la fuerza de unión entre la pieza cerámica y el soporte, juega un papel importantísimo en la calidad de la baldosa cerámica. Una buena adherencia debe asegurar una firme sujeción de las piezas al soporte. La evolución de nuevos materiales cerámicos con baja porosidad, resistencia a la abrasión, al hielo, grandes formatos, así como el montaje o instalación de los mismos en industrias, grandes áreas comerciales, fachadas, etc., hacen que se desarrollen productos adhesivos.

El conocimiento adquirido acerca del uso de adhesivos especiales, hacen que el proceso de colocación en capa gruesa (adherencia mecánica) sea sustituido por un sistema de colocación con capa fina (adherencia química) que ofrece claras ventajas, especialmente relacionadas con la calidad de la obra, tanto en lo que se refiere a la adherencia como a la durabilidad. Por lo que se escogerá un adecuado adhesivo en función de la superficie de colocación y el tipo de baldosa cerámica.

Es muy importante que en la colocación de la baldosa cerámica se utilicen las herramientas y útiles adecuados (llana dentada, maza de goma blanca, nivel de burbuja y ventosa). También debemos considerar importante que el soporte o base de colocación debe estar muy limpio de cualquier mancha resto de yeso, pintura etc. de forma que la adherencia podrá realizar sus funciones a lo largo del tiempo.

Deben considerarse siempre las indicaciones del fabricante de adhesivos.

Recommendations for laying rectangular pieces / Consejos de colocación para productos rectangulares

The adhesive manufacturer's instructions must be followed at all times.

Deben considerarse siempre las indicaciones del fabricante de adhesivos.

Broken joint pattern
(from 2 to 20cm)

Colocación Trabada

a media pieza
(NO ACONSEJABLE)

This manual is designed to improve the quality and maintenance of the installed ceramic tile by offering recommendations from professionals in the sector.

The user may follow all the recommendations given in the manual, or those relevant to the task in hand.

Both recommendations to follow and practices to be avoided are given.

Over the years, Geotiles has achieved sustainable growth in the competitive ceramic tile market. Our presence is now firmly established in the most important distribution channels across the globe, affirming the hallmarks of Geotiles is identity: quality, design and innovation.

Fomentar la calidad del producto ya instalado y su mantenimiento es el motivo por el cual ponemos a su disposición este manual con recomendaciones elaboradas por profesionales.

En consecuencia, usted puede considerarlas en todo o en parte, teniendo en cuenta no sólo lo que éste le recomienda, sino también lo que debe evitarse.

Geotiles ha logrado crecer sosteniblemente a través de los años en el competitivo mercado de la baldosa cerámica. Contando con una presencia estable en los principales canales de distribución de todo el mundo, con lo que calidad, diseño e innovación son las principales señas de identidad de Geotiles.

CERTIFICATES / CERTIFICADOS

Declaración ambiental de producto describe información ambiental relativa al ciclo de vida de las del producto, fabricado en un entorno geográfico y tecnológico en España en el año 2013. Esta Declaración ambiental de producto ha sidodesarrollada y verificada de acuerdo con las Normas EN 15804:2012 y EN ISO 14025:201

Declaración de prestaciones.
