1. Before laying the tiles finish the surface of the floor with wood float finish and complete the rendering and curing at least two weeks prior to laying. Please note that DO NOT FIX TILES ON FRESH SURFACE.

2. CHECK FEW BOXES BEFORE LAYING TO MAKE YOUR SELF SATISFIED FOR THE COLOUR VARIATION. ALSO MAKE SURE THAT THE DESIGN PATTERN AND THE ARROW MARKED ON THE BACK SIDE OF TILES MUST BE IN THE SAME DIRECTION. PLEASE NOTE THAT CERTAIN AMOUNT OF SHADE VARIATION AND SIZE VARIATION ARE THE INHERENT CHARACTERISTICS OF CERAMIC PRODUCT. COMPANY WILL NOT BEAR ANY RESPONSIBILITY ONCE TILES ARE FIXED.

3. To fix the tiles on the floor conventional sand and cement can be used but it is advisable to use the tiles fixing adhesives only for wall application. Also note that with the use of fixing media, all the instructions provided along with must be followed. DO NOT USE NEAT CEMENT.

4. GVT and Porcelain tiles are specially rectified tiles and since they have very low moisture and thermal expansion they can be laid without joints. It is not necessary to leave gaps between two tiles. BUT FOR BETTER AESTHETIC VALUE AND FOR GUARANTEED USE, PROVIDING SPACER IN BETWEEN THE TILES IS RECOMMENDED. At the time of laying do not use an iron hammer or some heavy material to press the tile.

5. After the fifteen minutes of the fixation, tiles should be wiped with a damp sponge and then clean the tiles with a soft dry cloth.

6. Company does not bear any liability for problems arising out of non fulfillment of the tile fixing instructions.

7. To clean the tiles, use water or diluted soap solution followed by water with soft cloth or sponge. DO NOT RUB HARD OR SCRATCH ON THE SURFACE.

NOTHING IN THIS INSTRUCTION MANUAL CAN SUBSTITUTE GOOD WORKMANSHIP OF SUPERVISION.
